Nguyen Quang Minh

has successfully completed the online Specialization

Practical Data Science for Data Analysts

This specialization equips learners with essential skills in Python programming, data preparation, and machine learning for financial analysis. Through hands-on projects, students apply techniques in linear regression, classification, and predictive analytics, gaining practical experience in solving real-world finance challenges with data-driven insights.

Ryan Spendelow
Senior VP, Training &
Curriculum

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
